- It takes 3 to 5 hours to properly repair and restore your computer to brand new running order.
- **We recommend having you drop off your computer or schedule to have it picked up for service to take advantage of the fixed fee charge!**
- When you drop of your computer you get our fixed **flat rate fee (\$75)** with NO over charges or diagnostic charges, you spend a little and get a lot!
- Best of all there's no 3 to 6 day wait to get your PC back. Drop off by 8pm, pickup next day after noon.

*With home service, college students take \$30 off. Just show your ID
All work guaranteed for 2 weeks after service!*

ABOUT

I started Nosleep PC repair because of recommendations from friends and family. They would bring PC's and laptops to me for repair and were amazed at how fast I finished them and how fast they ran after I was done with them. They also liked the fact that I didn't hit them with a lot of technical mumbo, and they found the instructions I left on their desktop helped them to keep their computers running fast and virus free. When they quoted some of the prices for repairs at other shops versus what I charged them, I was shocked. With 13 years experience with Windows machines I felt I could do something to help people, especially in times when people's pockets are not so deep.

I decided to start Nosleep PC repair as an alternative to the high priced pc repair shops or 'quick fix' repair individuals. I keep my pricing fair, and I never overcharge. Properly fixing a Desktop or Laptop PC is a 3 hour job minimum. I don't just repair the problem; I make sure it doesn't come back.

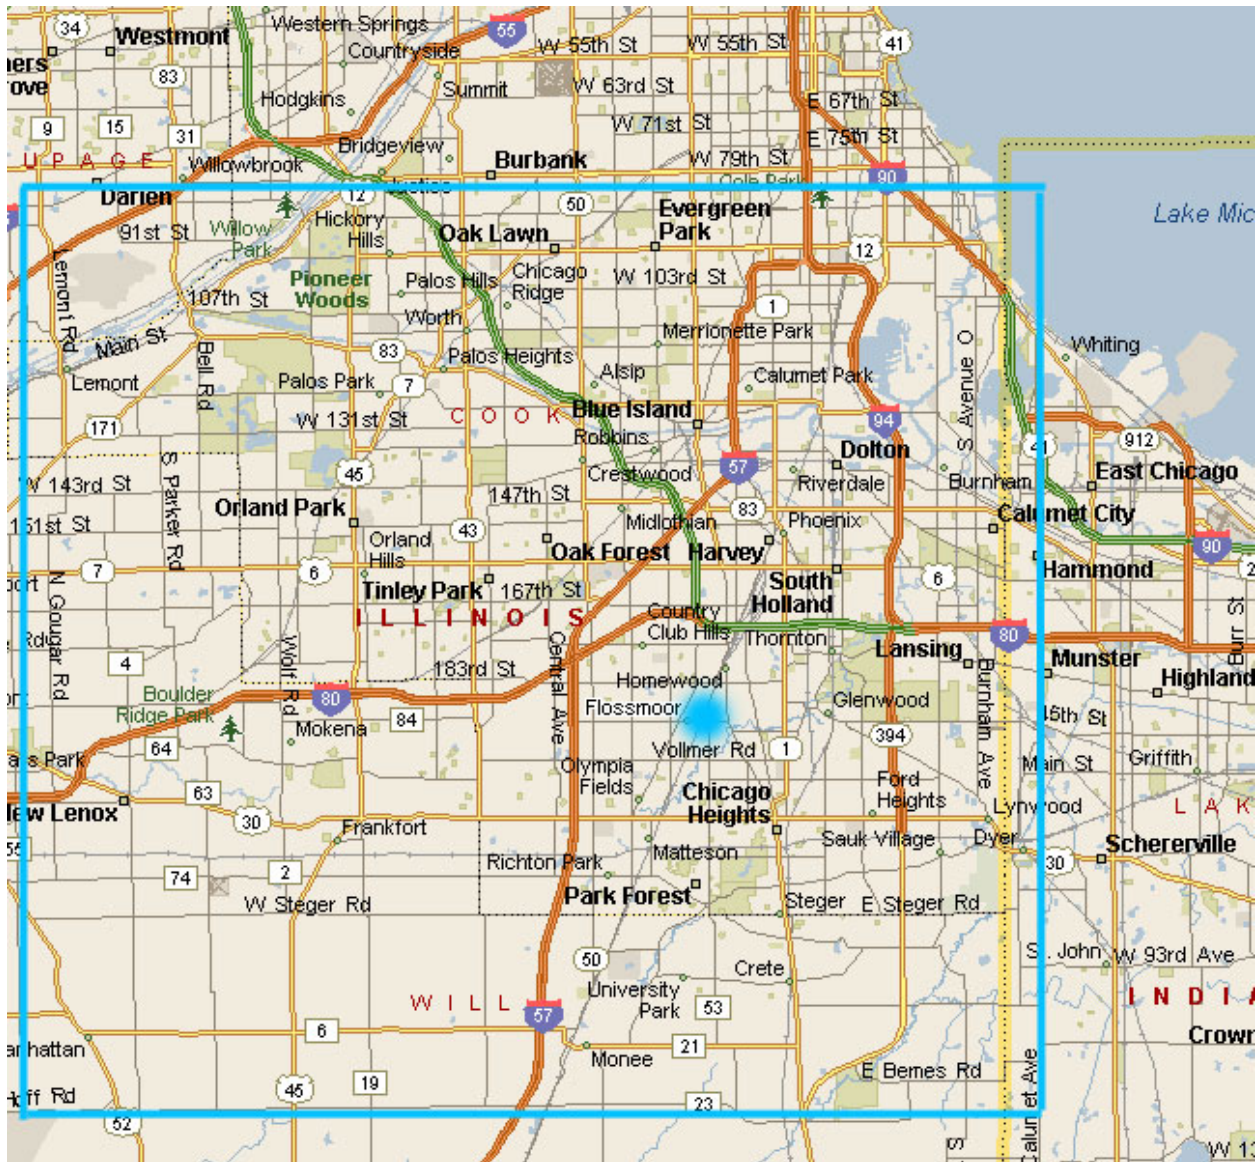

I use computers on a everyday basis to run my business, create websites (including this one), produce music, edit audio, graphic design and more. To have to go without a computer for longer than a half hour would put me in catatonic shock , so know that your PC is in good hands and I will have it back to you within 24 hours.
